

EDUCATION

- **Northeastern University** Boston, MA
B.S. in Computer Science and Mathematics Sep. 2016 – May. 2021
Magna Cum Laude

RESEARCH EXPERIENCES

- **Computational Biologist, Dana-Farber Cancer Institute** Boston, MA
Advisors: Saud AlDubayan, Eliezer Van Allen Jun 2021 - Present
 - Independently led multiple projects over a range of topics in cancer genomics, including uncovering the germline genetic architecture of breast cancer in understudied populations, understanding the influence of germline elements on disease presentation, identifying predisposition genes in rare cancers, associating tumor's genetic characteristic with immunotherapy response and more.
 - Performed large-scale genomic analysis using cloud computing tools (Terra, Google Cloud) and developed more than 50 workflows for common genomic tasks including sequence alignment, variant calling (short and structural variants), VCF manipulation, genotype phasing and imputation, genome and transcriptome wide association analysis, polygenic risk score calculation, statistical analysis and developed novel methods for data mining. The workflows are extensively documented and are shared amongst team members.
 - Acquired additional data to improve the statistical power of existing projects through initiating conversations with internal and external collaborators as well as curating data from publicly available databases such as the sequencing read archive. Presented research progress and learnings from conferences in multiple lab meetings and assisted with onboarding new members.
- **Researcher Assistant, Northeastern University** Boston, MA
Advisor: Predrag Radivojac Mar 2020 - Present
 - Identified population subgroups at high-risk of developing adverse pregnancy outcomes using association rules mining. Discovered non-linear interactions between exercise, genetic predisposition as quantified by polygenic risk scores, and risk for developing gestational diabetes. In addition, racial-ethnic disparities in high-risk subgroups were quantified using Gini coefficient and potential effects of policy interventions were investigated.
 - Constructed protein networks from multiple publicly available databases and utilized graph mining tools to discover protein complexes. Evaluated the performance of various machine learning models such as distance metric, SVM, neural network ensembles on protein-protein interaction prediction using measures such as area under ROC curve, precision-recall curve, and obtained confidence intervals via bootstrapping.
 - Collaborated with computer scientists, clinicians, and biologist from multiple institutes and communicated findings through presentations to an diverse audience including clinicians and researchers.
- **Research Experience for Undergraduate, Northeastern University** Boston, MA
Advisor: Jonier Autunes May 2019 - June 2019
 - Modeled biological networks with a death-birth update rule using graph libraries and reduced simulation run-time by 40% by implementing a custom data structure and optimizing the existing algorithm

WORK EXPERIENCES

- **National Institute of Allergy and Infectious Diseases** (Remote) Bethesda, MD
Data Scientists Fellow Oct 2020 - Dec 2020
 - Developed web scraping, data storage, data cleaning and visualization pipeline for the data usage of dbGaP. Maintained project repository with standard open-source practices such as version control, documentation, issue tracking and continuous integration

• Chewy

Software Engineer Co-op

Boston, MA

July 2019 - Dec 2019

- Developed new features on company product display pages using Vue components and maintained the legacy Stripes framework using JSP fragments, Java and Kotlin. Analyzed 2019 e-commerce conversion rate on Google Analytics by retrieving session data using SQL queries, segmenting sessions based on attributes such as device type and traffic channel, and forecasting conversion rate using linear regression

• BlockTEST

Front-end Engineer Co-op

Cambridge, MA

July 2018 - Nov 2018

- Designed and implemented 20+ webpages with HTML, CSS, Javascript and dynamically populated Bootstrap templates by making REST calls. Organized healthcare themed hackathon with emphasis on blockchain technology and hosted webinars.

TEACHING EXPERIENCE

• Technology Teaching Assistant

MATH 3081: Probability and Statistics

May - Jun. 2018

- Tutored students and created programming homework assignments in R.

ABSTRACTS

Peer-reviewed: (P - Presenter)

1. **Hoyin Chu (P)**, Marissa Hollyer, Seunghun Han, Sabrina Y. Camp, Riaz Gillani, Eliezer Van Allen, Nikhil Wagle, Corrie Painter, Saud H AlDubayan, *Patient-partnered Research Enables Germline Characterization of Angiosarcoma Predisposition Genes*, Submitted to the American Association for Cancer Research (AACR) annual meeting 2023 (Presented April 2023)
2. **Hoyin Chu (P)**, Abdullah Al-Sulaiman, Mohammed Al-Jumaan, Seunghun Han, Sabrina Y. Camp, Riaz Gillani, Yousef Al Marzooq, Fatmah Almulhim, Chitti Babu Vatte, Arij Alnimer, Afnan Almuhanha, Eliezer Van Allen, Amein Al-Ali, Saud H AlDubayan, *Multi-modal characterization of ultra-rare germline genetic variants driving breast cancer risk in the indigenous Arab population*, Poster Presentation, the Annual Meeting of The American Society of Human Genetics (ASHG), (Presented October 2022)
3. Mark Leick (P), Seunghun Han, Kathleen Gallagher, Harrison Silva, Grace Martin, Sarbina Camp, **Hoyin Chu**, Riaz Gillani, Michael Kann, Bryan Choi, Rebecca Larson, Merle Phillips, Tamina Kienka, Stefanie Bailey, Charlotte Graham, Christopher Reilly, Max Jan, Elba Gonzalez, Nora Horick, Justin Budka, Simone Filosto, Rhine Shen, Eliezer Van Allen, Saud AlDubayan, Marcela Maus, *Patients with Deleterious Germline Variants in STXBP2 Develop Toxicity after CAR-T Cell Therapy with Axicabtagene Ciloleucel*, Oral Presentation, American Society of Hematology (ASH) 2022 Meeting, (Presented December 2022)
4. Kiyomi Mashima (P), Benjamin Lampson, Aditi Gupta, Nicholas Moore, Anna Petrackova, Samantha Shupe, Stacey Fernandes, Amaro Taylor-Weiner, Riaz Gillani, **Hoyin Chu**, Seunghun Han, Sabrina Camp, Eric Kofman, Gad Getz, Catherine Wu, Eliezer Mendel Van Allen, Saud AlDubayan, Jennifer Brown, *Characteristics of rare germline ATM variants in chronic lymphocytic leukemia*, Poster Presentation, American Society of Hematology (ASH) 2022 Meeting, (Presented December 2022)

HONORS AND AWARDS

Dean's List , Khoury College of Computer and Information Sciences	2016-2021
Civic Digital Fellowship , Coding it Forward	2020
Amelia Peabody Scholarship , Northeastern University	2017

MISCELLANEOUS

Sub-reviewer

ASM-BCB, 2020-2022

ISMB/ECCB, 2021-2022
